WHY GREEN?

ANTIBACTERIAL

The writing instruments are made of an antibacterial plastic. An antimicrobial additive in the form of silver ions is added to the ABS plastic. An adhesion and settlement of bacteria or pathogens on the surface of the writing instruments is prevented or reduced.

TESTED & CERTIFIED

Laboratory tests have shown that up to 99.99% of bacteria and pathogens on the surface of writing instruments are destroyed. Tested according to ISO 22196:2011, the antibacterial effect is guaranteed for the entire life of the writing instrument and thus offers lasting protection.

MADE IN EUROPE

Short and fast delivery routes enable reliable and short-term production and create an additional contribution to the preservation to the environment.

CLIMATE NEUTRAL

The writing instruments are produced in Europe and finished climate neutral in the Black Forest. In this way, an additional positive contribution to the environment is made.

REALLY SAFE

The plastics employed are compliant with European and American FDA food contact regulations.

NATURE FRIENDLY

Made of non-toxic plastics, it has been designed to have a long life and to minimise the risk of harmful substances being released into the environment. Using a pen for as long as possible helps to reduce pollution and enables us to give full expression to the concept of promotion.

LOOKING TO THE FUTURE

Made of plastic suitable for toy manufacture (according to European standard EN 71-03 and U.S. FDA regulations).

GREEN CHEMICAL

It does not contain dioxin, phthalates, bisphenol A, antimony, arsenic, barium, cadmium, chrome, mercury, lead, polybrominated biphenyls (PBBs), polybrominated diphenyl ethers (PBDEs) or deca-BDE, and conforms to RoHS and REACH directives.

CLP COMPLIANT

It is rated as non hazardous pursuant to the Regulation on Classification, Labelling and Packaging.

A REALLY NEAT THING!
