RECYCLED PET PEN

500 ml

GOOD FOR THE ENVIRONMENT – GOOD FOR YOU

Your advantages with the uma RECYCLED PET PEN series

Recycling writing implements in different colours and surfaces.

Special colouring possible.

MIX and MATCH option.

One recycling process has already been carried out.

Can be recycled.

Material is very durable and suitable for upcycling.

More positive CO₂ balance. Significantly lower energy consumption in production compared to bio-plastics.

ClimatePartner-certified production and finishing.

Certified by Global Recycled Standard.

European production.

A 0,5 liter bottle gives a ballpen housing.

Nominated and awarded several times.

Sustainably combined with innovative writing technology – The uma ink flow system

Thanks to the innovative further development of the uma RECYCLED PET PEN PRO series, additional types of writing system and promotional options have been created for customers. Along with the classic ballpoint pen, other identical writing systems made from rPET material can be used with the same sustainability benefits.

This means you can now write sustainably with the **uma highlighter:**

RECYCLED PET PEN PRO LIQEO

Text markers are an essential office item. Thus, the highlighters in 6 writing colours are suitable for office use and as an advertising and communication tool. These models can be optimally used in schools, at training fairs or employee recruitment.

RECYCLED PET PEN PRO LIQEO

RECYCLED PET PEN PRO SI

Recycled² – the most sustainable combination in a writing instrument!

Recycled PET beverage bottles meet recycled aluminium beverage cans. The uma rPET PRO series is one of the most sustainable writing instrument developments in the promotional industry. A ClimatePartner-certified, European and Global Recycled Standard certified production built up the basics for long-lasting and sustainable writing. The new upcycling idea adds elegant metal applications to the previously pure recycled PET writing instrument series. A recycled aluminium 150ml beverage can is recycled into 10 valuable metal tips that meet a PET housing of a recycled 0.5 l PET bottle. So with the uma RECYCLED PET PEN PRO SI you write the most sustainable combination for the environment – just: uma Recycled².

made from ocean-bound plastic

uma **RECYCLED PET PEN PRO ocean**

The several small steps together make the big difference. With the idea of producing upcycled writing instruments from recycled PET bottles, uma is already making history. With the new **uma RECYCLED PET PEN PRO ocean** we are taking another step towards climate protection and sustainability.

For the production of the **uma RECYCLED PET PEN PRO ocean** we use collected ocean-bound plastic. In cooperation with Plastic Bank we are able to reduce the plastic waste in the coastlines and oceans and improve general living conditions for humans and animals.

The complete production process is ClimatePartner-certified. This not only increases the sustainability level of the product, but also proves your communicated advertising message.

Mix n' Match: From 2,000 pieces, you can choose any colour combination.

The rPET material, which is produced in Europe from recycled PET bottles, is suitable for a durable and sustainable advertisement. The uma RECYCLED PET PEN PRO antibacterial offers several sales arguments: recycled, environmentally friendly, ClimatePartner-certified, antibacterial and antiviral. Due to the special nature of the material (recycled PET material) production-related variations are possible.

0-2250 ANTIBAC: Retractable ballpoint pen made from recycled, antibacterial and antiviral recycled PET material with opaque glossy housing and clip. The ISO 22196 and ISO 21702 tested antimicrobial additive of silver ions gives the rPET material an antibacterial and antiviral effect that reduces the adhesion and settling of bacteria or pathogens on the surface of the writing instrument by 99.99%. The antimicrobial additive incorporated into the rPET material cannot be rubbed off or released and is effective over the entire life of the writing instrument. A permanent reduction of pathogens is given.
